DIPANJAN ROY

Tech Marketer · Meta Ads, Funnels & AI Automation · 3× AWS Certified

Bengaluru, India · Remote / hybrid | **dipanjanroy369@gmail.com** | **WhatsApp +91 98746 04663** | **dipanjanroy.cloud**

PROFILE

Tech marketer who builds the whole funnel: the Meta campaign, the creative (including AI video ads), the landing page and checkout, the tracking, and the WhatsApp and voice-AI follow-up. I started as a cloud engineer at TCS and learned marketing by selling products online, so I set up pixels, automations and AI agents myself — and judge campaigns on payments that reached the bank, not platform numbers.

SELECTED RESULTS

- **Meta Ads —** 30+ campaigns since 2023 across Sales, Leads, Engagement and Click-to-WhatsApp: 774K impressions and 11.6K clicks.
- **D2C products —** 100+ products sold through my Meta ads (room heaters and LED torches). Room heater click-through rate rose from 1.30% to 2.22% across three campaign rebuilds.
- **Astrology readings (D2C) —** 71 paid orders from 63 buyers in the first six weeks, every order matched to Razorpay. Revenue was 2.2x Meta ad spend; 2.18% CTR; 31% of orders chose the top tier.
- **Tracking —** found Meta Pixel double-counting and test orders marked as paid by reconciling against Razorpay; budget decisions use captured payments only.

EXPERIENCE

Performance Marketer — Freelance & Independent Projects

2023 – Present

Remote, India · D2C campaigns: astrology readings, room heaters and LED torches

- Planned, launched and optimised Meta campaigns: audience and creative testing, budget pacing, and ad-set restructuring on cost per purchase.
- Astrology readings: built the funnel end to end — Meta ads → animated landing page with an A/B variant → free first answer → Razorpay checkout — with a 4-tier offer ladder (₹49 order bump to ₹499 premium).
- Rebuilt weak campaigns instead of adding budget; built landing pages and sites on Shopify, WordPress and custom HTML.
- SEO in English, Hindi and Bengali from Keyword Planner data: 43 pages with hreflang and schema, plus 6 free calculators that lead into the paid app.

AI Automation & Lead Generation — Freelance

2025 – Present

Remote · AI services for small businesses (clinics, gyms, salons, local services)

- Built AI agents that audit a prospect's website and deliver a branded 7–12 page report on WhatsApp and email, used as a free lead magnet.
- Built an AI voice agent that calls a new lead within 15 minutes and sends an automatic WhatsApp recap; four WhatsApp templates approved by Meta.
- Prospecting: 640 local-business leads (London, Toronto, Sydney, Dubai) via the Google Places API.

Cloud & Agentic AI Engineer — Tata Consultancy Services

Nov 2021 – Present

India · Clients: British Airways, Qantas Airways

- Run production AWS infrastructure for large aviation clients: patching, monitoring, incident handling and compliance reporting.
- Requirement calls, status reviews and escalations with UK and US stakeholders, reporting to non-technical decision makers.
- Automate repeat work with Python, Bash and AWS Systems Manager; internal hackathon award for an AI-based innovation.

Business Developer (Intern) — Inline Private Limited

Feb 2018 – Apr 2018

Kolkata, India · Ride-hailing startup · Field acquisition: pitching, objection handling and driver sign-ups

LIVE PORTFOLIO — DIPANJANROY.CLOUD

- **GTM + website audit tool** (scores any site and writes a full go-to-market plan as a PDF) · **AI receptionist** you can call live · AI chatbot that answers from my résumé · AI video ads · Ads Manager screenshots.
